

## Easy and effective ways of integrating Technology into ELT Classes

The term “Technology” often brings to our minds a virtual chaos of hardware, software, as well as internet and of course the big technophobia all digital immigrant teachers have. However digital technology and its integration into our classes looks very complex and difficult to understand, it can be very simple by taking small effective steps!

In her talk Evridiki Dakos will exemplify and demonstrate effective and very practical ways of integrating technology into English classes as well as ways of improving digital skills.

In the first half, she will demonstrate ways of using some easily accessed simple software programs that can be used in class both by teachers and learners, including some techniques for creating materials. In the second half, she will give us a tour on internet showing a variety of effective Web 2.0 tools which can be integrated into language learning enhancing ELT classes and addressing digital natives’ challenging and changing needs.

A journey of a thousand miles begins with a single step.
